

Tarun Krishna Vankena

Software Engineer · Java Backend & Distributed Systems · 2 Years Experience
+91 6281482756 · tarunkrishna13579@gmail.com · linkedin.com/in/Tarun-Krishna-Vankena · Hyderabad, India

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building scalable backend systems and enterprise banking applications at Oracle Financial Services Software. Experienced in Java, Spring Boot, Microservices, REST APIs, SQL, Kafka, Docker, and Distributed Systems, with hands-on exposure to high-volume transaction processing, database optimization, production support, and CI/CD workflows. Currently contributing to Oracle FLEXCUBE platforms, focusing on scalable backend architecture, system reliability, and performance optimization for enterprise applications.

TECHNICAL SKILLS

Languages	Java, JavaScript, C++
Web and DB	HTML, CSS, Bootstrap, MySQL, Oracle SQL
Backend & Frameworks	Spring Boot, Spring MVC, Hibernate, JPA, REST APIs, Microservices
Tools & Platforms	Git, GitHub, Docker, Jenkins, CI/CD Pipelines, WebLogic, Flexcube, Salesforce, Postman
Core Concepts	Data Structures & Algorithms, OOP, DBMS, System Design, Multithreading

WORK EXPERIENCE

Software Engineer · Oracle Financial Services

Aug 2024 – Present | Hyderabad, India

- Delivered 10+ banking service modules supporting high-volume customer interactions across multiple financial product lines.
- Full-stack contributor: integrated UI, backend services, and automated testing for end-to-end delivery.
- Played a key role in production deployment cycles, ensuring stable releases for high-impact financial features.
- Customized FLEXCUBE modules to match client-specific banking workflows, improving configuration efficiency by 60% and reducing manual configuration cycles.

Salesforce Developer Intern · Appstrail Technology

Mar 2024 – Jul 2024 | Bangalore, India

- CRM workflow automation and Salesforce-backend integrations
 - Automated CRM workflows using Apex Triggers and Salesforce Flows, reducing manual operations by 40% across 5+ modules and cutting end-to-end processing time significantly.
 - Built REST API integrations between Salesforce and backend systems enabling real-time, bidirectional data synchronization — eliminating manual data entry and ensuring live CRM accuracy.
 - Optimized validation logic across 5+ Salesforce modules through trigger refactoring and flow consolidation, reducing end-to-end latency by 35%.

PROJECTS

Logistics Management System · Java, Spring Boot, Kafka, MySQL, REST APIs |

- Architected end-to-end shipment lifecycle management system using Spring Boot microservices — covering order creation, routing, and delivery confirmation with modular, independently scalable components.
- Developed REST APIs for real-time shipment tracking delivering sub-second response times under high-frequency operations, optimized through MySQL indexing and connection pooling.
- Designed modular service architecture enabling independent scaling of tracking, routing, and notification components.

Scalable Bidding & Auction System · Java, Spring Boot, MySQL, REST APIs, Gen AI |

- Built a real-time auction platform handling concurrent bids from 100+ simultaneous users with 100% data consistency under race conditions using optimistic locking.
- Optimized database queries using indexing and query tuning, improving performance by 25% under high-frequency bid operations.
- Implemented REST APIs delivering real-time bid updates with sub-second latency, ensuring seamless bidder experience at scale.

EDUCATION

B.Tech — Computer Science Engineering

Nov 2020 – May 2024

Koneru Lakshmaiah Education Foundation (KL UNIVERSITY) · CGPA: 8.78 / 10

CERTIFICATIONS & ACHIEVEMENTS

- Red Hat Certified Enterprise Application Developer
- Oracle Cloud Infrastructure 2023 Certified Multicloud Architect Associate
- Published research on Smart Agriculture System using IoT — demonstrating cross-domain engineering curiosity
- LeetCode: 300+ problems solved — strong foundation in Data Structures, Algorithms, and System Design
